-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 November 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

Regarding the IDS of 1/23/04 certain of the items listed that do not have a date have been lined through by the examiner since it cannot be ascertained if these items are prior art. Regarding the IDS of 12/17/03 the items listed are patent applications which are not prior art and have been lined through by the examiner.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10, 12, and 16-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Pace.

Pace shows an apparatus for running wire comprising a housing 11, a locking member 16, a piston 17, a coil spring 18, a notch 24, a guide pin 19, a projectile 15, and a wire 14. The frame surrounding the locking trigger may be termed a rail. Claim 1 merely inferentially includes the projectile and the pull string as an intended use statement. The projectile and pull string are therefor not considered to be part of the claimed apparatus for running wire and have not been accorded any patentable weight. In any case, Pace does, in fact, show a projectile and a line. The type of projectile used is no more than a matter of intended use.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pace in view of Doud.

Doud teaches that a projectile firing device may have slots in the housing for receiving guide pins attached to the piston.

To provide slots in the Pace housing for receiving guide pins attached to the piston would have been obvious for one skilled in the art at the time the invention was made in view of the disclosure of Doud. One of ordinary skill in the art would have been motivated to do this in order to guide the movement of the projectile and to further provide a convenient means of retracting the piston into the housing against the bias of the spring.

Claims 11, 14-15, and 20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention/species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11/14/05 and 9/27/05.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert C. Watson whose telephone number is 571 272-4498. The examiner can normally be reached on Mon. - Thurs. , 5:30am - 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph J. Hail III can be reached on 571 272-4485. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
